## Helpful hints and suggestions!

### About getting the job done!

Your home or property will become a temporary construction site while we complete the work we are contracted to do. There will be a few inconveniences and we ask for your help and cooperation during the project.

- If you have questions or concerns about the scope of work, the proposal, or work to be completed, feel free to call me at the number above.
- We will need access to your driveway or other access to roof with a dumpster or dump truck. Please remove all vehicles/objects from that path to allow for dumpster to be parked for a few days. If you have vehicles in garage that will be blocked, please move them too.
- During construction there will be loud noises and vibrations!
- We suggest you remove loose/breakable items from walls and shelves that can dislodge and break.
- Please remove items where roofing debris may fall, such as patio/pool furniture, grills, potted plants etc.
- For safety, please keep pets and children away from any part of the construction project.
- If rain is in the forecast we will take precautions to leave property water tight and schedule work around the forecast.
- Upon completion and prior to final payment you will have an opportunity to inspect the work with either your sales person or the supervisor.
- We will do our best at re-installing satellite dishes and other back to original position; however your satellite company may need to realign it.
- With your permission we would like to put a Roofing Experts sign in your yard during construction so that we can get new roofs for your neighbors too.
